TACTICAL COMMUNICATION SOLUTIONS

Training Programs

The Tactical Communication Solutions group at the Space and Naval Warfare Systems Center, San Diego (SSC San Diego) offers a full range of formal training programs on the operation and use of Data Link Test Tools (DLTTs). Training can be conducted at the user's site. Classes also are conducted periodically at SSC San Diego.

Programs for the following tools combine formal classroom training and hands-on laboratory exercises in small groups, usually no more than five students per instructor. Availability of DLTT assets at the user site may affect course length.

DATA LINK GATEWAY (DLGW) (TYPICALLY 3 DAYS)

Training includes: overview of DLGW purpose; hardware, software, and interface components; software functions; configuring and operating the DLGW; modes of operation for Link-16 and Link-11; Tactical Digital Information Link (TADIL) Joint (J) and Data Extraction and Reduction Guide (DERG) message displays; geographic tactical situation display functions; terminal and host operations; status monitoring functionality; data extraction and replay; familiarization with the operating system.

TADIL J HOST SIMULATOR (TJHS) (TYPICALLY 1-1/2 DAYS)

Training includes: overview of TJHS purpose; terminal control and monitor functions; hardware, software and interface components; configuring and operating the TJHS; geographic tactical situation display functions; script operations; data extraction and replay.

TRAINING MATERIALS INCLUDE:

- A Student Guide for each student
- An Instructor's Guide for the site
- An interactive training CD-ROM for the site
- A Software User Manual for the site

OTHER DLTTs

Informal on-the-job training also is available for the

- **Script Controller (SC)**
- **Script Generator (SG)**
- **Enhanced Data Analysis and Reduction Tool (EDART)**

Typically, half-day sessions are held on each tool. A user manual is included with each program.

TRAINING CDs AVAILABLE

Interactive training compact discs on the DLGW and TJHS are available for self-guided instruction. The CDs also can be used as instructional aids subsequent to formal training.

FURTHER INFORMATION

Data Link Test Tools are a family of applications developed and maintained by the Tactical Communication Solutions (TCS) group at SSC San Diego, Code 245, to facilitate TADIL integration and interoperability testing. Further information on schedules and costs for DLTT training programs is available from the following:
